

	NOTES AND SPECIFICATIONS
	CONSTRUCTION METHOD: SPEED HUMPS
	1. Setting out of hump - few days before construction.
	2. Saw cuts one to two days before construction.
	ON CONSTRUCTION DAY:
	3. Remove 500 mm asphalt strips.
	 Start erecting road signs and paint warning road marking. Place asphalt in strips and compact with two passes without
	vibrator.
	 Place templates - both sides of one lane at a time. Place asphalt and rake till slightly higher than templates.
	 Shape asphalt with straight edge (channel section 6 m long). Remove templates and compact without vibrator (three passes)
	10. Measure profile and rectify if necessary.
	 Final compaction with three to four passes with vibrator. Place road studs.
	13. Paint speed hump the next day.
	2. Traffic Signs:
	2.1 Only galvanised bolts and nuts to be used on W and R series
	(no uni-struts)
	2.2 All signs must be according to the Road Traffic Signs Manuals
	but use 900Φ STOP (60km/h zone) for 3-way and 4-way stops
	2.3 All signs excluding R1 series must have rounded edges
	3. ROADMARKINGS:
	3.1 All longitudinal road markings in 1.2mm thick thermoplastic.
	3.2 All small hand type markings namely STOP lines, Yield Lines, Pedestrian Crossing Lines, Block Pedestrian Crossings, Arrows
31	and Symbols to be in thermoplastic (1.2mm thick) or
• W332	two component cold plastic (MMA - Methyl Methacrylate) applied as a screed (1mm thick).
